5548	1570	liberty of Religion is graunted in	25

Yeare. of the world	Since Christs baptism	Memorable Accidents.	Tyme expired.
		France.	
5550	1572	The siege at Ostend began June 25.	22 19
5553	1575	Ostend is taken.	15
5557	1579	An hard frost.	5
5567	1589	A comet or blazing starre, from the 18 of Nouember till the 16 of December following.	
		Since his Maiesties Corona- tion in Scotland. Iuly. 29.	56
		Since his happie comming to London, May. 7.	20

Whereas (gentle Reader) for almost these Thousand  
yeares, in the Westerne Churches there hath bene recei-  
ued in vse an account of yeares, as it were from the Incarna-  
tion or Nativity of Christ, whereof one Dionysius of Rome,  
surnamed Exiguus, was the Authoꝝ: Touching the yeare and  
tyme of the yeare whereof being verymuch controuerted, it is  
not so certainly determined, & agreed, as it is acknowledged  
and graunted by the most, that Dionysius his opinion is false:  
it seemed good in stead thereof to resume the Epoche of yeares  
frome the beginning of the Gospell, or the baptisme of Christ,  
in the 15 yeare of this Emperre of Tyberius Cæsar, enacted &  
consecrated by the holy Euangelists themselues, & frequent-  
ly celebrated by the ancient Ecclesiasticall Histoꝝ & writers  
& Chzno-graphers and thereby approued true.

## A Prognostication.

¶ Astronomical Calculations for this  
present year, 1623.

**T**He true precession of the Equinoctiall (according to Tycho Brahe, and others the best Astronomers of this our age) is 28 de: 34 min: and 38 seconds.

The greatest obliquity of the Zodiacke, is 23. degrees, 31 min: and 30 seconds.

The Eccentricity of the Sunne is 3588. parts, the totall signe being 100000.

	deg:	min:	sec:

### Of the foure Quarters of the year, and first of Winter.

**W**inter, of Astronomers accounted the first quarter of the yeare, is called of Latines Hyems, which seemeth to be deriued of Græke word *hō* signifying to make moyst or wet, In Hebrew it is called Chóreph, comming of the roote Charaph, which signifieth to reproach, or disgrace, because thereby the earth is as it were disgraced, and exposed to reproach, being spoyled of all its pleasant greenesse, beauty, and splendor. It tooke his beginning vpon the 11. day of December last past, at 6 of the clocke and 50 min: in the after noone, at which moment the Sunnt entred into the first scruple

ple of the tropicall signe Capricorne, then being in his greatest declination from the Equinoctiall towards the south, viz. 23 degrees, 31', his meridionall height being no more then 14 deg. 56'.

### Of the Spring.

**T**he Spring is called in Latine Ver comming of  $\gamma$  Greeke radical word E'ap, signifying the same thing.

Others deriue it of Vireo, because then Omnia Virent, all things flourish. It beginneth at that instant when the Sun entreth into the first scruple of the Equinoctiall signe Aries, which happeneth this yeare the 10 of March, at 7 a clocke and 33. min: at night. This quarter is of the nature of the Ayre hot, and Moist.

### Of Summer.

**S**ummer in Latine Aestas, is so called of Aestas heate, both which words are deriued of the Hebrewe roote Elch, signifying fire: thereby denoting vnto vs the exceeding hot & fierie nature of this quarter, The Hebrewes call it Casis of the root Cuts, which in Hiphil signifieth to awake, or stirre vp. The reason of this denomination is, because that at this time, all things growing vpon the earth, are as it were awaked, & roused vp from that heauie slumber, wherewith all the winter time, they seemed to be deeply possessed. This quarter beginneth when the Sun entreth into the tropicall signe Cancer, then hauing the greatest North declination that can be, viz. 23 deg. 31. min. & a halfe, which cometh to passe this yeare vpon the 11. day of June, at 11 of the clocke, and 21 min: at night.

### Of Autumne.

**A**utumne, (so called a bonorum anni augmentatione) is the last quarter Astronomicall, but  $\gamma$  third after the common accompt, and taketh his beginning this yeare vpon the 13 day of September, at 1 of  $\gamma$  clocke, and 55 minuts after noone, that is, when the suns maketh his ingresse into the first scruple of the equinoctiall signe Libra. This Quarter resembles the earth being cold and dry.

Probo

## A Prognostication.

Now for these fower quarters in brieve and namely for  
the fruits they yeld, take these two verses of Ouid.

Poma dat Autumnus, formosa est messibus æstas,  
Ver præbet flores, igne leuater hyems.

Cheobulianigma de anno, Laert. lib 1.

Est vnus genitor, nati bona pignora bis sex,  
Hæc niueæ aspectu, nigræq; coloribus istæ,  
Atq; immortales omnes moriuntur ad vnum.

### Eclipses. 1623.

There will be this yeare presented to the view of the in-  
habitants of the earth, three Eclipses, to wit, one of the  
Sunne, and two of the Moone.

The first Eclipse will be of the Moone, and will visibly  
appeare vpon our Horizon vpon the first day of April at  
three of the clocke in the morning, to the quantity of eleauen  
poynts or digits (the whole body of the moone supposed to be  
diuided in twelue.)

The second Eclipse will be likewise of the Moone, & will  
happen vpon the 28 day of September at Ten of the clocke  
and 55 min, in the forenooe, but shall not be seene with vs.

The third Eclipse will be of the Sun, vpon the 13 of Oc-  
tober at 9 a clocke and 12 min: at night, not seene of vs,

### Of the moueable Feasts.

Moueable feastes are those which haue no fixed places in  
the Kalender, and are fixe in number, to wit Septuagesima  
Quadragesima, Easter, Rogation Sunday, Ascention, & Whit-  
sunday.

Septuagesima is so called of 70, as it were, contayning 70.  
dayes, which the Church doth obserue in remembereth of the  
70 yeares, that 7 Children of Israhell were vnder the Babilo-  
nicall seruitude, and is alwaies three Sundayes before Qua-  
dragesima.

Quadragesima, is simply sayd of 40. as contayning 40.  
dayes

ly for dayes, which the Church recounts in remembrance of the 40 dayes that Moses fasted, when he receiued the Lawes of our Lord. Elias fasted so many dayes, and so many dayes fasted Christ, before the tempter came.

Easter is the principall of all other feasts, & so ordayned of God at first, & at this day there be three sozts, that is, Pascha Hebræorum, the Iewes Easter, Pascha verum, our Easter: & Pascha novum, the Romans Easter.

The Iewes Easter was commanded to be kept the 14. day of the first moneth called Abib, which day at enen was the Lords Passouer: and the 15 day should be the holy Conuocation.

Our Easter was ordayned 323 yeares after the incarnation, in a Counsell of learned men of diuers nations, assembled by Constantine the great, for that purpose, wherein it was ordayned that Easter should be celebrated on the Sunday next folloving the first full moone that should happen after the entrance of the Sun into Aries, & a new Golden number was there deuised for the same intent. But by reason the Equinoctium still flies backward from the 21 of March where then it was, insomuch that it is now about the 11 day, by reason whereof I say there sometimes happens 2 full moones before we can keepe our Easter, which caused the Romans to alter their Kalender, so that by their Paschall tables they produce Easter alwaies 7 Sunday folloving the first full moone according to 7 foresaid generall cōcell held at Nice in Pontus.

Rogation is so called because, nos rogat Eclipsia, the Church commanded vs to continue fasting, processions, & prayers as well against the bodily woules such as late were in France, as also against the spirituall woules.

Pentecost is so called from πεντήκωστος which is so because there be 50 dayes betwixt Easter and Whitsunday inclusiuely. And this tyme the Church doth obserue in memoriall of the holy Ghost that appeared to the Apostles like clouen tongues. Actes. 2.

Of the Heavens, Starres, and Planets.

Hear

## A Prognostication.

**H**ea<sup>u</sup>en, in the mother of Tongues is called Schamajim; which word (as some affirme) is compounded of Scham signifying There or In that place, and Majim, waters. Whereupon they conclude, that Heauen is nothing else but Aquæ consolidatæ waters firmly compacted together, as it were Christall.

The Talmudists alledged that it is either compounded of the verbe Schaah signifying (in Hichpaël) to wonder and of Majim, because men are drawn into exceeding admiration, in considering the worke-manship of the Heauens: Or of Elch & Majim, fire and water. And thereupon Rabbi Bechai in the begining of Paralsch wrighteth after this manner: The Heauens (saith he) were created in the beginning, and are called Shamajim because they are Elch & Majim fire and water. And in Bereschith Rabba, it is thus red: The Heauens are so called because men wonder at them saying: Of what are they made? They are made of fire, they are made of water: This is a thing to be admired.

Yet true it is, that many excellent Gramarians suppose that this Hebzeue word is neither deriuatiue, nor compound but priuatiue, of which opinion is that famous Hebristian, Valentine Schindler. And Fagius a great author in that tongue (vpon the first chapter of Genesis) wrighteth that Abenesra proueth out of the Ismaelitish tongue (which hath very great affinity with the Hebzeu) that Schama signifieth nothing else, but High or Aboue.

But howsoeuer it be, or whatsoeuer is the true Etymologie of that word, this we are sure of, that Heauen in the Scripture is Threefould. 2. Corinth, 12. 2.

1 Aerie, where the Foules are. Gen. 2. 28.

2 Starry, where the Starres are. Gen. 1. 17.

3 Glorious, where soules are, & it is called the Heauen of Heauens, 1. Kings. 8. 27. & of Philosophers Empyream.

The middlemost of which thre called the firmament, is that which containeth all those beautifull and bright shining lights, created by the Almighty Elohim, God in thre persons vpon

upon the fourth day of the Creation, Gen. 1. 14. &c.

Which lights (whether moved in their severall spheres according to the generall opinion received frō reverend Antiquity: or else moved as Fishes in the sea, or Fowles in the Ayre, according to Tycho Brahe, and others the best moderne observatozs) by the common consent of all Astronomers, are of two sorts, that is to say, Fixed, and Wandring, called Planets of *πλανήται*, signifying to wander. Fixed Starres are divided into 48 Constellations, which are distinguished into 6 degrees of magnitude; Of the first magnitude are 15, Of the second 45, Of the third 208, Of the Fourth 474, Of the Fifth 217, Of the sixth 49, to which are added 5 of an uncertaine magnitude, called cloudy, and 9 other yet more obscure, of all which severall sums the foresaid sum 1022. is made. The Planets are in number 7 which are these,  $\text{♄}$  the highest, and next beneath the fixed stars;  $\text{♂}$  next, then  $\text{♂}$ ,  $\text{♂}$ ,  $\text{♂}$ , and  $\text{♂}$  in order. Now for the diameters, magnitudes, and distances of them, aswell fixed as wandring: behold this Table.

Starres of the magnitude.	have their true Diameters in propor- tion to the earths Diameter, as	19 to 4 269 to 60 25 to 6 19 to 5 119 to 36 21 to 8 31 to 11 12 to 5 5 $\frac{1}{10}$ to 1	Their bodies containyng the earths bodie.	107 $\frac{1}{6}$ 90 $\frac{1}{2}$ 70 $\frac{1}{3}$ 55 36 $\frac{1}{4}$ 18 $\frac{1}{10}$ 22 14 133	Times.	Their distances in Semidiameters of the Earth.	Their meane
Saturne						19000	
Jupiter						10550	
The ☉						3990	
Mars.						1150	
Venus		18 to 43	Contayned of p <sup>th</sup> Earth.	13		1745	
Mercur		6 to 11		6 $\frac{3}{4}$		1150	
The ☿		3 to 8		19		1150	
		2 to 7		49		60	

Heare noth that the semidiameter of the earth containeth 834. English Miles (according to the late ingenious mensurations of Willebrordus Snellius) the circuit thereof being 24100. miles. A

Phisicall Obseruations.

If thy body be filled with naughty and superfluous humors  
then were it conuenient for thee to draw blood, Obseruig.  
For

For the { Phlegmaticke } that { Aries, or Sagittarius.  
 { Melancholy } the { Libra, or Aquarius.  
 { Cholerickie } moone { Cancer, or Pisces.  
 { Sanguine } be in { any of the aforesaid.

Likewise you must obserue that the fittest time

For { Youth } to be let { Change to the first quarter.  
 { Middle age } blood, { First quarter to the full.  
 { Elder age } is from { Full to the last quarter.  
 { Olde age } the { Last quarter to the change.

Yet withstanding these & other such like cautions, if the blood-letting bee for the Phrensie, & Pestilence, the Squinzy, the Plurisie, the Apoplexy, for a continual head-ach, proceeding of choller or blood, or for any hot burning feauer, or other extreame paine; A man (I say) in such a case may not tarry a chosentime, regularly set downe by the Astronomer, or Physitian, because haply the Patient might miscarry in the meane season.

### Briefe Rules of Husbandry.

Sowe, set seedes, plant and graft the Moone in Taurus, Virgo, Capricorne, or Aquarius, & wind not easterly.

Sheare Sheep in the increas of the Moone.

Fell Tymber for building, towards and in the last quarter of the Moone.

Fell Fryth and Coppice for sawell in the 1. quarter.

Weld & lib cattle the moone in Aries, Sagittarius, or Capricorne.

Kill fat Swine for Bacon, about full Moone.

Cut Wines in February or March.

Remoue Trees at the last quarter, betwene Hollantide, and Twelfetide.

Fœlices animæ, quibus hæc cognoscere primum,

Inq; domos superas scandere cura fuit.

Credibile est illos pariter vitijsq; iocisq;

Altius humanis exeruisse Caput.
